CLAY BRICKS AND PAVERS

Pavers

Clay

Littlehampton Pavers

The Littlehampton Brick Company has been the leading South Australian brick maker for over 120 years.

Builders and renovators recognise the quality and reliability that Littlehampton represents and the extensive range of colours and textures that only kiln fired clay can provide.

Following advice from leading architects and building designers, we continue to constantly innovate our range of products and take pride in our tradition and commitment to quality.

Quality

Rich kiln fired colours, hand sorted and durable

Value

Low maintenance and price competitive

Service

Experienced team and professional service

Range

Huge range and expert brick matching service

Designed to last a
lifetime

Clay Pavers

Littlehampton pavers have been South Australia's favourite choice for over 120 years and have been used in many of Adelaide's finest landscapes.

The rich earthy tones add character and distinction to any project, regardless of design.

Add natural character

 Suitable for pathways and patios

 Suitable for domestic driveways

ASH
Light neutral tones

OLD RED
The rich soft tones of old reds
... always a classic.

TUSCAN
A natural sandstone blend

HILLS GOLD

A natural mellow blend with shades of terracotta

OLD RED COBBLESTONE

Authentic hand tumbled paver rich with tradition

MAHOGANY

A natural mix with rich tones

MAHOGANY COBBLESTONE

Authentic hand tumbled with rich tones

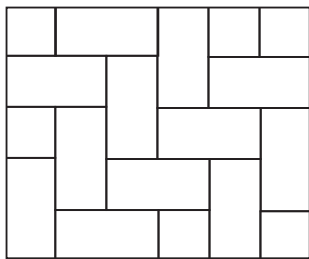

Product Information

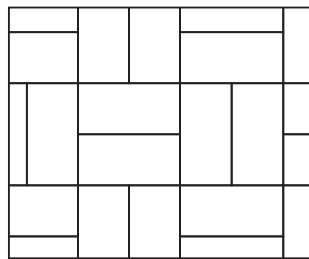

Paver specifications

Pavers per square metre	38
Paver weight - 50mm	approx 2.8 kg
Paver weight - 62mm	approx 3.7 kg
Paver weight - 70mm	approx 3.8 kg
Paver dimension	230mm x 114mm
50mm pavers per pallet	650
62 & 70mm pavers per pallet	500
Pallet weight	approx 1.7 ton

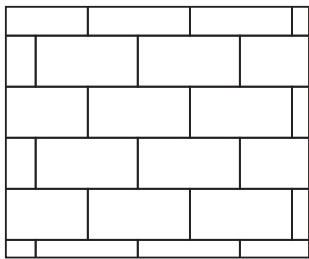

Paving patterns

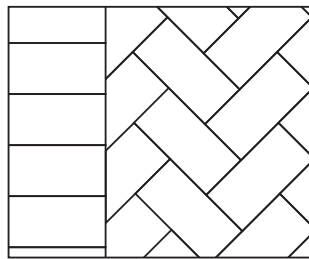

90° Herringbone

Basket Weave

Stretcher Bond

45° Herringbone & Header

Laying information

We recommend the use of washed concrete sand as the best base for all natural clay pavers. This will minimise efflorescence, which is the leaching of salts from the pavers causing a white powdery residue to accumulate on the face of the paver. The use of any other material may increase the degree of efflorescence.

Colour variation

All natural clay Bricks and Pavers are sold as a blend and due to the manufacturing process, some colour variation will occur. We recommend when laying clay bricks or pavers to work from three pallets at any one time, blending evenly to provide a mixture of colour.

The clay paver advantage

Natural
Made with local clays, our pavers are virtually age-proof and totally recyclable

Locked in colour
Kiln Fired at over 1100°C to lock in the natural colours

Permeable paving

A permeable paving system enables rainfall to soak into the subsoil where it can drain harmlessly away rather than run off into hard pressed drains. We now offer a permeable clay paving solution that allows rainwater to percolate through the pavers and dissipate into the soil below.

Roadways / Footpaths / Parking Spaces

Permeable brick paving is created using certain kinds of brick and laying techniques to create surfaces that allow water to pass through to the soil rather than stand on the surface.

Tree Protection Zones

In consultation with leading arborists, the system is designed for use over and around tree root protection zones. The paving aids environmental issues because water and oxygen are passed through to the soil below around the root zones of the tree.

Nothing matches the colour and durability of clay pavers.

Durable

Clay's durability makes it suitable for high traffic or commercial use

Low

Maintenance
Clay bricks and pavers will not need sealing or re-colouring and will keep their natural beauty for a lifetime

Non Slip

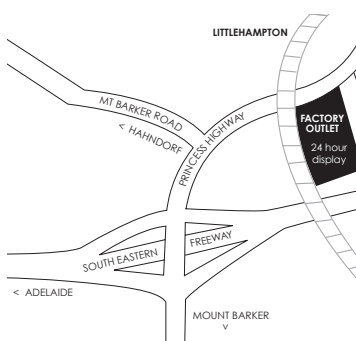

The natural texture and firing process give Clay a natural slip resistance

South Australia's leading clay pavers.
